***Detailed Action***

**Manual Adjacencies Alternate Routing**

***Response to Arguments/Remarks***

1. The instant application has been submitted as a reissue patent application of patent 6,276,687 on 8/20/2003.
2. Amended claims 1 – 2 are pending in the instant application.
3. Examiner withdraws the objection to the specification in view of Applicant's amendments to the specification and title.
4. Examiner has considered amended claims 1 and 2 of 8/20/2003, and in consideration of Applicant's arguments of 6/1/2009, find the application to be in condition for allowance.

***Allowable Subject Matter***

5. Claims 1 – 2 are found to be in condition for allowance.
6. The following is a statement of reasons for the indication of allowable subject matter:
7. The instant application has been submitted as a reissue patent application of patent 6,276,687 on 8/20/2003. The Application is directed to Synchronous Digital Hierarchy (SDH) communications network where an Intermediate Systems (IS), the IS being divided between at least one IS--IS Area and one non-IS--IS Area across which routing loops could be formed. To mitigate this, the static routes (Manual Adjacencies (MA) are created at IS within the IS--IS Area to point to routes to a group of Network Equipments (NEs) within the non-IS--IS Area.
8. In reviewing the proposed amendment, Examiner finds the claims neither broaden nor narrow the scope of the invention, but clarify it. In particular, claim 1, specifics in step d) clarifies the object of the

Art Unit: 2416

preposition 'means for removing' i.e. from the MA; In claim 2, step b) revises the origin of the message to be from a network element and not the MA.

9. MPEP ¶ 1404 cites, in part, 1402 [R-7] Grounds for Filing

A reissue application is filed to correct an error in the patent which was made without any deceptive intention, where, as a result of the error, the patent is deemed wholly or partly inoperative or invalid. An error in the patent arises out of an error in conduct which was made in the preparation and/or prosecution of the application which became the patent. There must be at least one error in the patent to provide grounds for reissue of the patent. If there is no error in the patent, the patent will not be reissued. The present section provides a discussion of what may be considered an error in the patent upon which to base a reissue application. In accordance with 35 U.S.C. 251, the error upon which a reissue is based must be one which causes the patent to be "deemed wholly or partly inoperative or invalid, by reason of a defective specification or drawing, or by reason of the patentee claiming more or less than he had a right to claim in the patent." Thus, an error under 35 U.S.C. 251 has not been presented where the correction to the patent is one of spelling, or grammar, or a typographical, editorial or clerical error which does not cause the patent to be deemed wholly or partly inoperative or invalid for the reasons specified in 35 U.S.C. 251. These corrections to a patent do not provide a basis for reissue (although these corrections may also be included in a reissue application, where a 35 U.S.C. 251 error is already present). These corrections may be made via a certificate of correction; see MPEP § 1481. The most common bases for filing a reissue application are:

- (A) the claims are too narrow or too broad;
- (B) the disclosure contains inaccuracies;
- (C) applicant failed to or incorrectly claimed foreign priority; and
- (D) applicant failed to make reference to or incorrectly made reference to prior copending applications...

10. In this instance, Examiner finds the bases for filing a reissue application reissue to be (B).
